# **SECTION 2 – ACADEMIC DETAILS**

## **Subject Rationale**

In this subject, students will study the historical foundations that underlie the contemporary development of mindfulness as a method for achieving well-being. Through the study and practice of mindfulness students will explore and develop diverse skills and techniques including: 1) Refining mindfulness skills; 2) Cultivating selfreflection and compassion; 3) Evaluating ethical principles of working with clients. Students will come to recognise

the importance of understanding the full potential of mindfulness practices, and its application, in both self-care practices and the care of others.

### **Learning Outcomes**

- 1. Describe the contemporary development of mindfulness from its historical and cultural origins.
- 2. Evaluate the evidence of mindfulness practices and their use within health care settings.
- 3. Demonstrate ability to perform a variety of mindfulness practices.
- 4. Demonstrate ability to educate and communicate mindfulness practices within the healthcare setting.
- 5. Develop an understanding of reflective practices in mindfulness.
