SECTION 1 – GENERAL INFORMATION

Award/s: Total Course Credit Points: Level:
Bachelor of Complementary Medicine 48 2nd Year

Duration: 1 Semester

Subject Coordinator: Faith Best (Brisbane Campus)

Subject is: Core

Subject Credit Points: 2

Student Workload:

<table>

Delivery Mode:

e-Learning (Online)
Narrated PowerPoint presentations
Tutorials: Asynchronous tutor moderated discussion forum and activities
Student handouts, web-based resources

Full Time
Part Time

Pre-requisites: Nil
Co-requisites: Nil

SECTION 2 – ACADEMIC DETAILS

Subject Rationale

This subject introduces students to the cultural, ethical and social dimensions of human nutrition in a variety of local and international contexts including Australian Indigenous culture. Students explore different cultures and the associated social and environmental factors that impact on their understanding of food, diet and eating. Students will learn to analyse and evaluate a variety of diets and culturally based dietary medicine systems from a physiological perspective taking into consideration both current research and cultural aspects of food use. This subject provides the underpinnings of cultural competency and essential context when constructing dietary interventions in later nutritional medicine and clinical practicum subjects.
Learning Outcomes

1. Identify and discuss the social and cultural factors that impact on dietary and individual food choices.
2. Apply sociological perspectives to explain the relationship between people and food in both local and international contexts.
3. Examine and distinguish different cultures and social classes, and the associated social, economic and environmental factors that impact upon their concept of food, diet and eating.
4. Identify and explore appropriate articles relevant to food and nutrition issues.
5. Establish strategies for modifying dietary behaviour in individuals and groups from a sociological perspective.

Assessment Tasks

### Subject Content

<table>
<thead>
<tr>
<th>Week</th>
<th>Lectures</th>
<th>Tutorials / Practicals</th>
</tr>
</thead>
</table>
| 1.   | **Introduction** (Subject Outline / Subject Aims / Assessment / Teaching Resources)  
Social determinants of health and Introduction to Food, Culture, Society and the Individual (including the Sociological Perspective)  
Social determinants of health  
What is sociology?  
Where did sociology come from?  
Sociology and nutritional medicine management  
Overview of factors that impact on food choices  
Using social science perspectives and social theory to understand food and nutrition issues  
The value of qualitative research in nutrition | Activities are developed to allow the students to explore relevant concepts, expand on ideas and have peer and lecturer interaction. Activities also allow for formative assessment and feedback  
Forum discussion: The role culture and society have in food choices, and how this might impact on the nutritional status of individuals  
Watch short video on the anthropology of food choice. Comment on the findings as a general introduction to the topic |
| 2.   | **The Determinants of Food Choice**  
Biological- hunger, appetite, and taste  
Economic- cost, income, and availability  
Physical- access, education, skills (cooking), and time  
Culture, family, peers, and meal patterns  
Psychological- mood, stress, and guilt  
Attitudes, beliefs, and knowledge of food | Forum discussion: Identify the factors that influence their personal food choice and present these findings in the forum, under the discussion |
| 3.   | **Managing Dietary Change: Theoretical Approaches and Practice**  
Lewin’s Change Model  
Health Belief Model  
Stages of Change Model  
Motivational Interviewing  
Glasser’s Control Theory  
Ecological perspective model | Forum discussion: Students discuss, using the provided readings, the different theoretical approaches to supporting and managing dietary change |
| 4.   | **Food, Culture and Identity - Part 1: European & British Culture**  
Influences on Southern, Central and Eastern Europe and UK culture | Forum discussion: discuss the different role food plays in European and British culture and how this may affect the theoretical nutritional management of such populations |
### 5. Food, Culture and Identity - Part 2: Middle Eastern & Indian Culture
- What defines Middle Eastern culture?
- What defines Indian culture?
- What are the explicit food practices of these populations?
- Influences of Middle Eastern and Indian culture on contemporary food and nutrition practices

**Facilitation**
- Discussion with online tutor: How has Anglo-Celtic culture influenced contemporary food and nutrition practices?

**Forum discussion:**
- Discuss the different role food plays in Middle Eastern and Indian culture and how this may affect the theoretical nutritional management of such populations
- Facilitated online discussion: How has the Indian culture influenced food and nutrition practice in both a local and international settings?

### 6. Food, Culture and Identity - Part 3: Chinese, South East Asian and Japanese Culture
- What defines Chinese and South East Asian Culture?
- What are the explicit food practices of this population?
- The influences of Chinese and South East Asian culture on contemporary food and nutrition practices

**Facilitation**
- Forum discussion: discuss the different role food plays in Chinese, South East Asian and Japanese culture and how this may affect the theoretical nutritional management of such populations
- Facilitated online discussion: Has Chinese culture influenced Australian culture? If so, in what ways and have they been advantageous or disadvantageous?

### 7. Food and Culture - Part 4: Australian Indigenous Culture
- What defines Australian Indigenous culture?
- What are the explicit food practices of this population?
- History of Australian Indigenous people and health and disease
- The social determinants of Australian Indigenous health

**Facilitation**
- Documentary: Highlighting the impact of white settlement on aboriginal culture, food and health
- Following video presentation, facilitated online forum discussion, on the impact of white settlement on food, culture and health

### NON-TEACHING WEEK (note that make-up classes may be scheduled in this week)

**Semester 1** – This aligns with the week after Easter so it may fall between Weeks 6 to 8

**Semester 2 & Online students** – The non-teaching week falls between Weeks 7 and 8

### 8. Contemporary Food Habits and Family Dynamics
- Contemporary dietary influences
- The sociology of vegetarianism
- Fast foods, eating out, convenience, and ‘dietary individualism’

**Facilitation**
- Facilitated forum discussion on the impact of family dynamics on food and nutrition considering differing cultures and differing family dynamics and values
### The Family System
- Family dynamics
- Maternal ideologies and infant feeding

- Food manufacture and agribusiness
  - Public perception of biotechnology and organic farming
  - Globalisation versus ruralisation
  - Unsustainable food production – origins and alternatives
  - The role of supermarkets in food manufacture and choice

  Forum discussion: Debate the following, presenting both sides of the argument. Are supermarkets to blame for consumers poor food choices?

### 10. The System and Politics of Food - Part 2: Politics & Policies
- Politics and policy
  - The medicalisation of food
  - Greening of food and labelling
  - Dietary guidelines
  - Corporate interests

  Forum discussion: Debate the following- “The medicalisation of food is necessary in Australia.” Discussion to involve:
  - The politics and policy of food
  - The role of dietary guidelines

### 11. Food, Gender and Ageing
- Influences of gender on food and nutrition
- Gender division of household and food tasks
- Cultural and sociological perspectives of ageing on food choice and eating

  Forum discussion: Consider the provided reading and comment on how this may affect the theoretical nutritional management of a client

### 12. Eating Disorders, Obesity & Body Image
- Understanding eating disorders
- Exploring the experiences of those with eating disorders and the impact this has on nutritional management
- Understanding obesity
- Body acceptance: exploring women's and men's self-experiences
- Stigmatisations associated obesity and the impact this has on nutritional management

  Facilitated forum discussion: Explore food behaviours

### 13. Chronic Disease (Diabetes, Cardio-vascular (CVD) and Cancer)
- Understanding diabetes and CVD from a sociological perspective

  Forum discussion: Review the qualitative papers provided surrounding the feelings and experiences reported by people with diabetes, CVD and cancer
  - Share one finding within forum discussion
