

SUBJECT OUTLINE

Subject Name:

Subject Code:

Introduction to Complementary Medicine Clinical Practice

HMCL221

SECTION 1 – GENERAL INFORMATION

Award/s:	Total Course Credit Points:	Level:
Bachelor of Complementary Medicine	48	2 nd Year
Duration: 1 Semester		
Subject is: Core	Subject Credit Points: 2	

Student Workload:

No. timetabled hours per week: 3	No. personal study hours per week: 2	Total hours per week: 5
Delivery Mode*:		
<input type="checkbox"/> On campus	<input checked="" type="checkbox"/> Online / Digital	<input type="checkbox"/> Blended
		<input type="checkbox"/> Intensive
Weekly Session^ Format/s - 1 session per week:		
<input checked="" type="checkbox"/> eLearning modules: Lectures: Narrated PowerPoint presentations Tutorials: can include asynchronous tutor moderated discussion forum and activities, learning journal activities or other web-based resources		
<p>*All modes are supported by the online learning management system which will include subject documents such as handouts, readings and assessment guides.</p> <p>^A 'session' is made up of 3 hours of timetabled / online study time per week unless otherwise specified. Each subject has a set number of sessions as outlined above.</p>		
Study Pattern:	<input checked="" type="checkbox"/> Full Time	<input checked="" type="checkbox"/> Part Time
Pre-requisites:	HOMC111, NATP111, CMPF121, NMDS122, MSTP211	
Co-requisites:	Nil	

SECTION 2 – ACADEMIC DETAILS

Subject Rationale

This subject is a basic introduction to the practice of various complementary medicine disciplines, including Nutritional Medicine, Naturopathy, Musculoskeletal Therapy, Acupuncture, and Homeopathy. Students will be introduced to the application of clinical theory and practice through a mixture of lecture, model case workshoping, and clinical observation. Students will gain a basic understanding of the components of various complementary medicine clinical encounters, as well as the methods and decision-making processes used to formulate and carry out treatment strategies and manage clients over a course of treatment.

Learning Outcomes

1. Identify the components of a complementary healthcare visit for various disciplines and how they contribute to the clients' increasing wellbeing.
2. Identify the structure of a client interview / intake and the types of information elicited from clients for various disciplines.
3. Identify the basic diagnostic processes and frameworks for assessment and treatment planning utilised by various disciplines.
4. Compare and contrast the different approaches to clinical practice among various complementary disciplines.
5. Critically reflect the experience of observing clinical practice for a variety of complementary medicine disciplines.

Assessment Tasks

Type	Learning Outcomes Assessed	Session Content Delivered	Due	Weighting
Mid-semester Exam multiple choice and short answer questions	1-3	1-5	Week 6	30%
Case Notes on Model Client (1000 words)	1-4	1-7	Week 8	30%
Reflective Report based on observation of clinical practice (1000 words)	1-5	6-13	Week 13	40%

All written assessments and online quizzes are due at 11:55 p.m. Sunday and submitted through the LMS.

Pass Requirements

To achieve a passing grade in this subject, students must:

- have a cumulative mark of at least 50%, and
- have submitted all assessment items with a value greater than 15%
