SUBJECT OUTLINE

Subject Name: Nutritional Medicine Clinical Practicum 1
Subject Code: NMDC313

SECTION 1 - GENERAL INFORMATION

Award/s: Bachelor of Health Science (Nutritional and Dietetic Medicine)  Total Course Credit Points: 96  Level: 3rd Year
Duration: 1 Semester
Subject Coordinator: Gabrielle Covino (Melbourne campus)
Subject is: Core  Subject Credit Points: 6

Student Workload:

</table>

Delivery Mode:
- Face to Face (On campus): 3 x 3 hours clinical practicum
- Intensive Delivery (Summer School): Contact hours are delivered over 6 weeks with 3 x 6.5 hour days delivered per week

Content: Clinical practicum

Assessment: Attendance - Weeks 1-6; Condition Product Comparison - Week 3; Mid-semester Reflective Review Presentations - Week 3; Case Study - Week 4; Final Reflective Review Presentations - Week 6

Full Time
Part Time

Pre-requisites: BIOE221, NMDC221, BIOS222, HMCL222, HMCL223
Co-requisites: SOCI221

Special Resource Requirements:
- HLTAID003 Provide first aid (VET unit of competency)
- Mandatory LMS-based clinic induction and quiz
- Minimum of three clients as per the Clinic Client Recruitment Policy to demonstrate the students' self and clinic promotion

Professional Dress Standards as described by Endeavour Clinic Student Handbook

Endeavour Clinic Student Handbook

WWCC (or its equivalent) for the location in which subject is undertaken as per Working with Children Check Policy

Kit items include:
- Endeavour black tunic
- Measuring tape
- Otoscope
- Penlight
- Percussion reflex hammer
- Sphygmomanometer
- Stethoscope
- Thermometer
- Timing device
SECTION 2 – ACADEMIC DETAILS

Subject Rationale
Clinical students practise nutritional and dietetic medicine under the supervision of qualified practitioners in the Endeavour Teaching Clinics, by taking a secondary role in client assessment and care in partnership with a senior, primary practicing student. Practical application of holistic medicine clinical skills such as history-taking, education of the client about nutritional medicine and the general course of treatment, holistic medicine assessment techniques, pathology testing and conventional physical examination techniques, guide the student in actively participating in the development of an individual treatment plan. Background research on each client’s condition and evidence–informed treatment options is conducted by the student between client visits. Clinical students apply holistic medicine theory and principles in case management with diverse clients and the range of acute and chronic conditions that present in our clinics.

Learning Outcomes

1. Integrate the application of holistic medicine philosophy, principles, ethical and professional values, knowledge and skills to the assessment and management of clients in a clinical setting.
2. Critically evaluate and reflect on diagnostic and treatment options based on totality of professional education thus far, along with review of relevant research, clinical experience, cultural considerations and client preferences to contribute to the construction of a suitable and effective evidence-based treatment plan.
3. Display appropriate professionalism while maintaining a therapeutic relationship with the client when faced with ethical or boundary issues in clinical practice.
4. Observe and contribute as a practitioner in nutritional medicine consultations to assist in analysing clinical data essential to formulating and recommending appropriate client management options.
5. Develop high level communication skills to present well considered and integrated evidence-based clinical knowledge.
6. Model professionalism and entrepreneurial attributes in business and professional practice; including Work Health and Safety (WH5) standards, office reception, clinical procedures, dispensing and marketing.

</thead>
</table>
| 1-13. | Clinic practicum goes from Week 1 to Week 13 with a one week non-teaching week around Weeks 6 - 8 in Semester 1 (depending on Easter) or between Weeks 7 & 8 in Semester 2. Mid-semester reviews are conducted in Weeks 7 - 8 and students are presented with written and verbal feedback from each supervisor about their performance in clinic in relation to specified rubrics, and marks are aggregated to provide a single grade. Final reviews of clinical practicum are conducted in Week 13 and students are presented with further written and verbal feedback from each supervisor about their performance in clinic in relation to specified rubrics, and marks are aggregated to provide a single grade. In Clinical Practicum students are evaluated on their ability to apply their knowledge and skills in a professional manner. Therefore students should note that, although helpful, previous success in academic subjects does not guarantee success in Clinical Practicum. During this Clinical Practicum, students will practice under supervision either singly or in pairs:  
  - Conducting clinical consultations and observations  
  - Good practitioner-client communication  
  - Give short, oral presentations to supervisor and student peers in relation to client management and professional practice  
  - Case taking |
- Clinical examination skills
- Interpretation of biomedical and functional test results
- Differential diagnosis
- Developing individualised treatment plans
- Appropriate referral
- Presentation to supervisor and obtaining approval for treatment plan
- Office management skills, dispensing and reception duties
- Observing all clinic policy and procedure
- Participating in debriefing sessions at the conclusion of each clinical practicum to identify any important issues
