Delivery Mode:

Clinic Block: 2 x 4 hour clinic practicum sessions over 12 weeks.

Delivery:

Full Time

Part Time

Pre-requisites: CMTN321, CMPR411

Co-requisites: Nil

Special Resource Requirements:

- HLTAID003 Provide first aid (VET unit of competency)
- LMS-based clinic induction and quiz
- Professional Dress Standards as described by the Endeavour Clinic Handbook
  - Endeavour Clinic Handbook
  - WWCC (or its equivalent) for the location in which subject is undertaken as per Working with Children Check Policy

SECTION 2 – ACADEMIC DETAILS

Subject Rationale

The CMTN411 subject provides students with clinical practice experience. Each clinic student is expected to professionally manage clients as they attend to their clinical rounds. Supervisors expect clinic students to manage the consultation process and provide them with an accurate final diagnosis, prognosis and treatment for approval. By practicum conclusion students will have developed further confidence in clinically managing clients.
Learning Outcomes

1. Consistently apply Endeavour College clinic code of ethics, policies and procedures and appropriate professional, ethical and legal requirements and / or considerations to clinical practice and management.

2. Consistently apply professional Chinese medicine knowledge and skill from questioning, clinical investigations (e.g., tongue and pulse), traditional Chinese medicine (TCM) diagnosis, principles of treatment and prescription, prognosis to the construction of appropriate treatment.

3. Consistently apply appropriate skills in the safe application of Tui na and allied Tui na techniques.

4. Compare and contrast various Tui na treatments appropriate to individual cases.

5. Develop a coherent argument for the utilisation of specific Tui na treatments for individual cases.

6. Critically evaluate the outcome of each individualised treatment based on follow-up feedback from the client.

| 1-12. | Clinic practicum goes from Week 1 to Week 12.  
Mid-semester reviews of clinical practicum are conducted in Weeks 6-7 and students are presented with written and verbal feedback from each supervisor about their performance in clinic in relation to specified rubrics, and marks are aggregated to provide a single grade.  
Final reviews of clinical practicum are conducted in Week 12 and students are presented with further written and verbal feedback from each supervisor about their performance in clinic in relation to specified rubrics, and marks are aggregated to provide a final grade.  
In Clinical Practicum students are evaluated on their ability to apply their knowledge and skills in a professional manner, therefore students should note that, although helpful, previous success in academic subjects does not guarantee success in Clinical Practicum.  
During Tui na Clinical Studies 2 students will practice under supervision:  
- Conducting clinical consultations and observations  
- Good practitioner-client communication  
- Case taking  
- Clinical examination skills  
- Chinese medicine diagnostic techniques  
- Chinese medicine differential diagnosis  
- Developing individualised treatment plans  
- Performing Tui na and allied treatments  
- Appropriate referral  
- Present to supervisor and obtain approval for treatment plan  
- Office management skills, dispensing and reception duties  
- Observe all clinic policy and procedure and WHS practices  
- Participating in debriefing sessions at the conclusion of each clinical practicum to identify any important issues. |
