Delivery Mode:
Clinic Block 2 x 4 hour clinic practicum sessions over 12 weeks (includes 30 mins per session set-up / pack down time per session).
Delivery Full Time
Part Time

Pre-requisites: SOCQ121, CMAC221, CMCS221, BIOS222, CMAC222, CMAC223

Co-requisites: BIOE221, CMAC311

Special Resource Requirements:
- Flat soled, closed toe leather footwear or approved equivalent
- HLTAID003 Provide first aid (VET unit of competency)
- LMS-based clinic induction and quiz
- Professional Dress Standards as described by the Endeavour Clinic Handbook

Endeavour Clinic Handbook

WWCC (or its equivalent) for the location in which subject is undertaken as per Working with Children Check Policy

Clinical equipment kit including:
- Measuring tape
- Otoscope
- Penlight
- Percussion reflex hammer
Sphygmomanometer
Stethoscope
Thermometer
Timing device (with second-hand)

SECTION 2 – ACADEMIC DETAILS

Subject Rationale

This subject provides students with clinical practice experience. Each clinic student is expected to professionally manage patients as they attend clinical rounds. Supervisors expect clinic students to manage the consultation process and provide them with an accurate final diagnosis, prognosis and treatment for approval. By practicum conclusion clinic students will have developed further confidence in clinically managing patients.

Learning Outcomes

1. Consistently apply Endeavour College clinic code of ethics, policies and procedures.
2. Consistently apply professional Chinese medicine knowledge and skill from questioning; clinical investigations (e.g. tongue and pulse); TCM diagnosis, principles of treatment and prescription, prognosis to the construction of identified treatment.
3. Consistently demonstrate appropriate skills in the application of acupuncture, moxibustion and allied acupuncture techniques in consultation with patients and specific to their requirements.
4. Consistently apply appropriate professional, ethical and legal requirements and/or considerations to clinic practice and management, ensuring adherence to record keeping and infection prevention and control guidelines when implementing strategies to ensure quality assurance and risk management in clinic practice.
5. Compare and contrast various acupuncture treatments sourced from research and classical texts appropriate to individual cases to improve overall treatment efficacy and prognosis.
6. Develop a coherent argument for the utilisation of specific acupuncture treatments for individual cases.
7. Apply safe and effective acupuncture treatments.
8. Critically evaluate the outcome of each individualised treatment based on follow-up feedback from the patient.
9. Communicate effectively with clients/patients, their carers and families ensuring patient involvement in structuring a treatment plan in managing their presenting health issue, identifying any risks and benefits of each option to allow informed decision making.

| 1-12. Clinic practicum goes from Week 1 to Week 12.  
Mid-semester clinical assessments are conducted Weeks 6 -7 and students are presented with written and verbal feedback from each supervisor about their performance in clinic in relation to specified rubrics, and marks are aggregated to provide a single grade.  
Final clinical assessments of clinical practicum are conducted in Week 12 and students are presented with further written and verbal feedback from each supervisor about their performance in clinic in relation to specified rubrics, and marks are aggregated to provide a single grade.  
In Clinical Practicum students are evaluated on their ability to apply their knowledge and skills in a professional manner. Therefore students should note that, although helpful, previous success in academic subjects does not guarantee success in Clinical Practicum.  
During Chinese Medicine - Acupuncture Clinical Practicum students will practice under supervision either individually or in pairs:  ‣ Conducting clinical consultations and observations  ‣ Good practitioner-client communication  ‣ Case taking  ‣ Clinical examination skills  ‣ Interpret biomedical and functional test results  ‣ Chinese medicine diagnostic techniques  ‣ TCM differential diagnosis  ‣ Developing individualised treatment plans  ‣ Appropriate referral  ‣ Present to supervisor and obtain approval for treatment plan  ‣ Needling, moxa and allied techniques  ‣ Office management skills, dispensing and reception duties |
- Observing all clinic policy and procedure
- Participating in debriefing sessions at the conclusion of each clinical practicum to identify any important issues
