SECTION 1 – GENERAL INFORMATION

Award/s: Total Course Credit Points: Level:
Bachelor of Health Science (Naturopathy) 128 Elective 4th Year
Bachelor of Health Science (Myotherapy) 96 Core 2nd Year

Duration: 1 Semester

Subject Coordinator: Amy Hulse (Brisbane Campus)

Subject is: Core or Elective as noted

Subject Credit Points: 2

Student Workload:

<table>
<thead>
<tr>
<th>No. timetabled hours per week:</th>
<th>No. personal study hours per week:</th>
<th>Total hours per week:</th>

</tr>
</tbody>
</table>

Delivery Mode:

Face to Face (On Campus)
1 x 1 hour lecture
1 x 2 hour practicals

Full Time
Part Time

Pre-requisites: MSTA121

Co-requisites: Nil

Special Resource Requirements:
1 bath-sheet sized towel per student (Clinic towels must not be used)
Attire that allows effective palpation while acting as student model
Goniometer
Myofascial release balm and associated safety data sheet

SECTION 2 – ACADEMIC DETAILS

Subject Rationale

This subject aims to introduce key elements of the orthopaedic examination of the lower limb. Students will focus on postural assessment, joint range of motion testing and palpation. The student will gain valuable insight into movement (kinetics and kinematics), the anatomical structures that support movement and those which create stability. This subject will furthermore provide students with a broad understanding of myofascial trigger points, including: aetiology, history and context, diagnosis and neuromuscular treatment techniques. Students completing
this subject will be able to complete a basic range of movement assessment of the lower limb, detect movement dysfunction and resolve dysfunction of trigger point origin using neuromuscular techniques.

Learning Outcomes

1. Apply understanding of joint movement and joint mechanics.
2. Demonstrate practical competence and understanding in joint assessment techniques of the lower limb.
3. Explain the theory, clinical characteristics and neuromuscular techniques for myofascial trigger points of the lower limb.
4. Demonstrate practical application of a variety of therapeutic interventions to deactivate trigger points of the lower limb.

Assessment Tasks

| 1.   | **Introduction** (Subject Outline / Subject Aims / Assessment / Teaching Resources)  
**The Joint Assessment Routine**  
- Overview and rationale  
- Lower limb observation and postural assessment  
**Biomechanics**  
- Joint movements  
- Overview of kinematics | Postural assessment  
Observation of the lower limb  
Joint movements of the lower limb |
| 2.   | **The Ankle and Foot**  
- Active, passive and active resisted range of movement  
- Length testing  
- Palpation | Ankle and foot assessment |
| 3.   | **The Knee**  
- Active, passive and active resisted range of movement  
- Length testing  
- Palpation | Knee assessment |
| 4.   | **The Hip**  
- Active, passive and active resisted range of movement  
- Length testing  
- Palpation | Hip assessment |
| 5.   | **The Pelvis**  
- Active range of movement  
- Palpation | Sacroiliac joint assessment |
| 6.   | **Biomechanics**  
- Kinetics | Forces and movement |
| 7.   | **Gait**  
- Normal and abnormal gait  
- Basic gait assessment | Basic gait assessment |

<table>
<thead>
<tr>
<th>Section</th>
<th>Description</th>
</tr>
</thead>
</table>
| **8.** Trigger Points and Neuromuscular Techniques (NMT) | i. Overview, context and historical understanding
ii. Aetiology, clinical features & diagnosis
iii. Pathophysiology
- Identification of common trigger points of the lower limb |
| **9.** Trigger Points | i. Neuromuscular techniques for the pelvis and thigh
- Diagnosis & palpation
- Reliability of palpation
- Neuromuscular techniques for the pelvis and thigh |
| **10.** Trigger Points (Continued) | i. Neuromuscular techniques for the knee, leg and foot
- Neuromuscular techniques for the pelvis and thigh |
| **11.** Trigger Points (Continued) | i. Case-study based treatment of trigger points
- Applied case studies |
| **12.** Integration: Putting It All Together | i. Case-study based assessment and treatment of the lower limb
- Integrated assessment and treatment of the hip and knee region
- Clinical reasoning
- Exam Preparation
- Posture and gait assessment
- Range of movement assessment
- Treatment of trigger points |
| **13.** Final Practical Exam |
| **14.** Non-Teaching Week/Practical Examination Week 1 | Note that make-up classes may be scheduled in this week |
| **15.** Non-Teaching Week/Practical Examination Week 2 | Note that make-up classes may be scheduled in this week |
| **16.** Final Examination Week 1 | Students are required to sit examinations using the Respondus Lockdown Browser software per the Examination Policy – Higher Education. Refer to your local campus calendar for exam opening and closing times. |
| **17.** Final Examination Week 2 | Students are required to sit examinations using the Respondus Lockdown Browser software per the Examination Policy – Higher Education. Refer to your local campus calendar for exam opening and closing times. |
